Spring, 2024

Dear Aarush,

Congratulations on being named a Rensselaer Medalist! We are thrilled that your school has chosen to recognize your achievement in math and science.

As you continue your college search, we hope that you will seriously consider a future at Rensselaer in one of our Architecture, Business, Engineering, Science, Information Technology & Web Science, or Humanities, Arts & Social Sciences degree programs.

Here are a few facts for you to consider as you celebrate your award:

- The Rensselaer Medal was first presented in 1916 with two purposes: to recognize the superlative academic achievement of students, and to motivate them toward careers in science, engineering, and technology.
- The Medal is awarded to promising secondary school juniors who have distinguished themselves in mathematics and science.
- This \$40,000 per year merit scholarship is guaranteed for four years (five years for the School of Architecture program) for each Medalist who applies, is accepted, and chooses to enroll at Rensselaer.
- Nearly 10% of Rensselaer's Class of 2025 are recipients of the Rensselaer Medal.
- The official Medal will be presented to enrolling Medalists in the fall of their first year at Rensselaer.

We will be in touch this summer with information about opportunities to connect with our campus, as well as our students and faculty. In the meantime, please engage with us virtually through webinars, virtual tours, and more at go.rpi.edu/visit! You may learn more about what a Rensselaer education has to offer at www.rpi.edu.

Again, congratulations on being named a Rensselaer Medalist! If you have any questions, or if we can be of any assistance during the application process, please feel free to contact us at admissions@rpi.edu.

Sincerely,

Sarah Maliarik
